## *SOUL CATCHER by Gregory*

*Come take the journey and allow Soul Catcher to capture your Native Heart.*

Soul Catcher is a Native Heart collection of beautifully recorded electronic and acoustic instrumental compositions, as well as a debut recording by Gregory. The selections are ambient, ethereal and introspective, and take the listener on a soul journey into a "cellular" and historical past creating an environment of visionary awareness and cultural expression. The music is personal and culturally spiritual...a sonic voyage of reflection, vision, and inner exploration. Open your own spiritual portal and allow yourself to be transformed as this CD truly catches and holds your soul during the 51 minute journey. Don't forget to invite your power animals.

From the opening notes of the title track to Transformation, its infinite conclusion - Soul Catcher captures the imagination, heart and spirit with its thoughtful movements. Composed, performed, produced and engineered by Gregory each piece is a journey unto itself combined with that unique ability only the best composers possess making an overall complete musical statement. An inspiring listen to say the least. - *T. Conboy, Los Angeles, CA* -

Gregory's music encourages a journey of the soul that brings to mind playful, as well as, solemn feelings reminiscent of seasons past. - *N. Stetz, Boulder, Colorado* -

**TITLE:** Soul Catcher  
**ARTIST:** Gregory  
**LABEL:** Soul Catcher Music  
**PRODUCER:** Gregory  
**INSTRUMENTATION:** Synths, Lakota Indian Flute, Native Percussion, Voices

Soul Catcher is a journey into Native Heart, Electronic Ambient and Space oriented music intended to relax the listener while guiding them on their own unique and personal journey. For the past several years, Gregory has been composing and performing music as a form of self exploration, discovery and inner expression. Soul Catcher is the first in a series of recordings that reflect this thought process.

“Some of my influences in recent years have been artists like David Arkenstone, Peter Buffet, Richard Burmer, R. Carlos Nakai and many others who have laid the groundwork into New Age, Ambient, and Native influenced styles of music.” Soul Catcher includes animated and ambient electronic textures and landscapes under melodies that are sometimes light and airy, and other times reflective and almost haunting.
